Splash! Caddie

The Splash! Caddie facilitates handling, transporting and storing a Splash! aquatic lift. Fabricated from rugged steel for strength and powder-coated for appearance, the Splash! Caddie helps to protect both your investment and your staff. The Caddie simplifies both insertion and removal of the connector shaft into the insert in the pool deck and becomes a convenient storage rack for the lift when not in use.

Spine Board Attachment

The Spine Board Attachment works with any standard spine board (not included). Simply remove the chair assembly by pulling the attachment pin and replace that assembly with the spineboard attachment. One person can easily extract an injured swimmer from a pool, keeping the injured person fully supine during the procedure.

All-Weather Covers

"Pal" cover

"Splash!" cover

Protect your investment with a full, all-weather cover. Custom fitted for both the PAL-Portable Aquatic Lift and the Splash!. The cover is made from rugged blue nylon cordura.

Arm Rests/Foot Rest

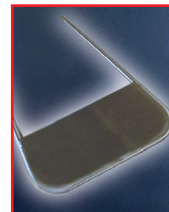

Removable stainless steel arm rests and foot rest for increased sense of security.

For Both PAL & Splash! Pool Lifts

Leg Extension

Extended leg rest facilitates deck clearance, especially with lifts used with spas.

For Both PAL & Splash! Pool Lifts

Deck Anchor

Standard 6" deep x 1.9" diameter.

For **Splash!** Pool Lifts Only
